Description			
Wir hatten ein Problem in der DB, das ich auf folgende (anonymisierte) Log-Zeilen zurückführen konnte:

Für die zweite Hälfte des Logs fehlt der feUser - es scheint der User hat/wurde ausgeloggt. Das Problem damit ist, dass die SIP-Links für die Formulare nur mit Login sichtbar sind und das Formular deshalb davon ausgeht, dass der FE-User definiert ist. Natürlich ist es unser Fehler, dass wir das im Formular nicht abfangen. Allerdings bricht QFQ sowohl hier wie auch bei #9898 das intuitive Verständnis von Login/Logout. Sicherer und User-freundlicher wäre es, wenn ein Logout sich sofort auf alle SIP und Formulare auswirkt. Konkret also.			

Aufgefallen ist uns das ganze, weil in der letzten Zeile `subject_of_study` falsch ist (da das in einem Extra-Feld mit einem Query ...
WHERE shortname={{ feUser:TE }} gefüllt wird)
