Description			
Dear Krisp-Team			
We're deeply impressed by you noise cancelling app. Currently we're working on a streaming solution (based on antmedia.io) for our seminars and lectures (University of Zurich).			
1) Is it possible to implement KRISP centrally on a streaming server? Best would be a linux version of KRISP where we can start one KRISP process for a given virtual room. If this is not possible/available, another way might be to use Windows based virtual machines (with KRISP) per virtual room.			
2) Licensing: We would like to start with 5 midrange seminar rooms (60 places=participants) in autumn semester (due to covid19, the rooms are not allowed to be full placed). This means one virtual conference room with ~60 participants, 5 days a week, working hours. How would be the price?			
Thanks and again congratulations to your great product.			
CU Carsten

- Status changed from New to Rejected

Hey there,

Noticed you were interested in taking a look at Krisp, so I wanted to introduce myself as a resource to you.

Would you have a few minutes to connect? If not via email is fine too. You can pick a time on my calendar (<https://krisp.orcharon.com/c/bkremerkrisp-ai>) if that works best for you.

Looking forward to connecting.

PS...here's a cool Verizon video about Krisp. <https://www.youtube.com/watch?v=zXcaQuL5jZw>

Thanks,
Brian

Kurzer Test mit Devio DCM-1 und

- Krisp Desktop App
- Krisp Google Chrome Browser App

Das Stoergeraesch war ein Staubsauger (ziemlich laut).

Mehrere Zuhoerer bestaetigen, dass sie den Krisp Sound schlechter verstehen konnten als das Orginal + Staubsauger.

Aktuell wird der Einsatz von KRISP nicht weiter geplant.
