Description			
We had a dynamic updated note-Element with value			
#!report			
10.sql = SELECT notes FROM rooms WHERE building = '{{building:FSRD:alnumx}}' AND room = '{{room:FSRD:alnumx}}'			
10.twig = {{ result.0.notes }}			
The note-Element is not updated, if the notes is empty or the query does not return a row.			
The following code works:			
#!report			
10.sql = SELECT notes, RAND() AS dummy FROM rooms WHERE building = '{{building:FSRD:alnumx}}' AND room =			
'{{room:FSRD:alnumx}}'			
10.twig = {{ result.0.notes }}			
(Since we only update via T3 Extension store, we are still running 20.4 so this might be fixed by now.)
