Description Specific form mode requiredOffButMark breaks under inclusion of a required checkbox form element. The form is unsavable and no SQL is performed when pressing save. Form is stuck in yellow save button mode, see image.

Revision 7888a8ec - 17.12.2020 11:48 - Marc Egger

Fixes #11750 checkbox produces two input html elements with the same name

This fixes the current issue but is not a nice solution.
We just loop through all input elements having the same name.
It would be better, if we would filter out hidden elements.
But this might break some other behaviour... so I chose this approach.
