Description

Unter <http://docs.qfq.io/en/develop/Form.html#type-upload> > downloadButton steht:

```
The following attributes are hard coded (can't be changed): s|M:file|d|F
```

Fuer 's' und 'F' ggfs. 'M' ist das vermutlich ok, aber via 'd' koennte man den Namen angeben unter dem das File gespeichert wird - und das waere gut wenn man es setzen koennte.

Beispiel: eine Datei ist (wegen uniqueness) gespeichert als '12345_talk.pdf'. Es waere gut wenn man dan 'talk.pdf' angeben koennte.

Associated revisions

Revision 86e1c393 - 31.01.2021 23:44 - Carsten Rose

Bug Fixes #11925. Form.parameter.downloadButton might contain now all parameter, incl. d, G, KeyValueStringParser::explodeEscape() has been refactored. Function Link->paramPriority() has been renamed/rewritten to Link->paramPreparation(): double fire of explode() eliminated, code should be more efficient. Several new/enhanced unit tests.

Revision 80f2c05e - 31.01.2021 23:48 - Carsten Rose

Merge branch 'B11925downloadButtonParameterFilename' into 'develop'

Bug Fixes #11925. Form.parameter.downloadButton might contain now all...
