<https://github.com/tinymce/tinymce/blob/develop/modules/tinymce/src/core/main/ts/api/AddOnManager.ts>

It seems to just load all plugins within the folder plugins.

To add tinymce plugin: in grunt uglify, export to 'typo3\_js' + 'plugins/pluginname/plugin.min.js'

Example charactercount:

```
[...]
    uglify: {
      [...]
      qfqTinyMCECharCount: {
        src: ['javascript/src/Plugins/tinymce.charcount.js'],
        dest: typo3_js + 'plugins/charactercount/plugin.min.js'
      },
    },
  },
[...]
```
