<b>Description</b> <ul style="list-style-type: none"><li>• The behaviour is ok for 'New &gt; Save &gt; Edit subrecords' - cause it's not necessary to reload the current form.</li><li>• The behaviour is bad for 'New &gt; Close: Save=yes' - the user clicked on close but only save, no close.</li></ul> <p>When <a href="#">#3980</a> is implemented, the second situation can be implemented by defining 'client' as response.</p>
