<b>Description</b> Hi Carsten  The pill "Minor" should be hidden when the program "Biomedicine" is selected. The dynamic update does not work for pills or template groups (we have discussed this already briefly on the phone).  <b>Now, I have tried to make the dynamic update settings within the template group elements. But also this has no effect when the form is dynamically updated.</b> Do you have a solution for this issue? Unfortunately, the hidden minor program is also a requirement of the study program Biomedicine. I cannot go online before this is solved.  Many thanks, Karin

Hallo Karin

du kannst die 0.25.6 installieren - die Pills koennen nun dynamisches show/readonly/hide und der Titel des Pills kann auch angepasst werden.

Die 0.25.5 hat zwei ziemlich krasse Fehler ([#5004](#), [#5016](#)).

Vielen Dank

Hallo Carsten

Zuerst einmal wünsche ich Dir ein glückliches Neues Jahr!

Vielen Dank für die Integration der dynamischen Pills! Es funktioniert bestens. Ich habe gerade die qfq Version 25.9 installiert.

Lieber Gruss,  
Karin
