

QFQ - Bug #7305

Typo3 BE Editor screws up with indentation

20.11.2018 14:13 - Nicola Chiapolini

Description When I edit a report in the backend newlines usually start somewhere in the middle of the editor window (i.e. the automatic indentation adds a lot of unneeded spaces). It's rather annoying :-) The number of spaces is not constant and I could not yet figure out what the number of spaces depends on.
