Created branch for issue and implemented it. Twig errors are shown.

**Problem:** QFQ removes new line characters early. The whole Twig template is on one line which makes the error messages useless.

**Solution?:** We have to find a way to keep the new line characters in the twig template when parsing a QFQ report.

**#5 - 18.08.2020 11:07 - Marc Egger**

- Status changed from In Progress to Priorize
