Description Auf w16 werden ueber ein AutoCron Skript gitlab Berechtigungen erzeugt. Dieses Script benoetigt mehrere Minuten. Scheinbar hat der CLI PHP Interpreter einen Timeout, der das Skript hart abbrechen laesst. Der System Cron sendet dann eine Mail: FROM: root@math.uzh.ch TO: www-data@math.uzh.ch SUBJECT: Cron <www-data@w16> /usr/bin/php /var/www/html/my/typo3conf/ext/qfq/Classes/External/autocron.php DATE: 01.10.2019 - 13:03:01 PHP Warning: file_get_contents(https://w16.math.uzh.ch/my?id=updateGitlabPrivileges&token=secret...&nId=all): failed to open stream: HTTP request failed! in /var/www/html/my/typo3conf/ext/qfq/Classes/Core/Helper/DownloadPage.php on line 73	
Subtasks: Bug # 9298: file_get_content Timeout Error Closed	

History

#1 - 15.10.2019 18:29 - Marc Egger

Das Timeout ist momentan auf 20min (1200 Sekunden) hartcodiert. Siehe DownloadPage.php:

```
'http' => array(  
    'timeout' => 1200,  
),
```
